

HOTEL CONCEPT WITH GBT-UV45

Drinking Water System

GBT - UV45 treats water for the entire hotel, school or house. It eliminates 99.99% of bacteria, viruses and chlorine-resistant parasites such as Cryptosporidium and Giardia. The water passes first through two different cartridge filters consisting of a particle filter and an active carbon filter. Thereafter the water passes through a UV aggregate type UVMAX D4.

Users

- Vacation houses
- Larger individual houses
- Schools
- Hotels
- Offices
- Health Centers, Hospitals

	GBT-UV45
Technical data	
Capacity max *	45 liter/min
Power connection	120-240 V
Power requirement	50 W
Working Pressure max	9 bar (900 kPa)
Material	SS 304
Connection ext.	3/4"
Dimensions	
UV-chamber	52 x 10 cm
Total Size (WxHxD)	62 x 28 x 63 cm

* Specified capabilities refer to transmission value of 85% at 10 mm cuvette and a dose of 25mJ/cm²
